

## DIAMOND RESOURCES CO.

DIAMOND RESOURCES CO. is a North Dakota corporation providing a wide range of petroleum land services throughout the country. Established in 1980, Diamond Resources has leased over 50,000 mineral owners for more than 75 client-companies during the last 34 years, including over 1 million acres in the Bakken. Diamond's services include oil and gas leasing, title examination, due diligence, drillsite and right-of-way acquisition, drillsite title curative, abstracting, GIS mapping, among other energy-land related activities.

Diamond has offices in Denver, Colorado and in Williston and Bismarck, North Dakota. With a staff of 35 and a leasing, title and right-of-way group of well over 100 landmen, we are able to handle even the largest of jobs. Our lease and title database are linked, enabling complete communication between the leasing and right-of-way acquisition sides and the mineral and surface title sides of the land business. In this way we are able to provide you with a wide range of up to the minute reporting capabilities for virtually any analysis you may require for your project.

## REACH

Diamond has the ability to quickly mobilize a team anywhere in the country. With an average of over 6 years of experience, our people are very skilled at working in new areas, and with people of all backgrounds. The following are locations in which we have worked and are very familiar with the courthouse records and governmental regulations:

North Dakota	Utah
Montana	Mississippi
Wyoming	Alabama
South Dakota	Florida
Colorado	New Mexico
Kansas	Louisiana
Michigan	Texas
Washington	Oklahoma
Indiana	Saskatchewan, Canada

We have a number of clients that utilize our services in whichever state that they work, as they are very comfortable and satisfied with the quality of our work and the skill of our people.

## RIGHT OF WAY STATS

Diamond has been involved in right-of-way acquisitions since the company's beginning, but has hit full stride in recent years. Since 2010, Diamond has acquired rights of way on behalf of various producers and midstream companies on 32 gathering systems from origination in Western ND and Eastern MT totaling over 2100 miles. We have also added 750 miles of extensions and loop lines to clients' previously existing systems in the Bakken region. The systems include crude, natural gas, freshwater and saltwater. Diamond has also completed right-of-way projects for various public utilities including power line and water supply systems.

We have recently completed acquisition for a 238 mile multi-state crude oil transmission line.
